

ONE HEALTH SYMPOSIUM 2026

PRE-SYMPOSIUM WORKSHOPS

WORKSHOP A

An Introduction to Descriptive, Spatial and Temporal Analysis for Disease Surveillance

 July 8, 2026

 Joselito & Olivia Campos
Interactive Teaching Lab, Areté,
Ateneo de Manila University, QC

OVERVIEW

This beginner-friendly workshop introduces the fundamentals of descriptive spatial and temporal analyses for epidemiology, covering how disease patterns can be analysed by person/animal, place, and time. Through hands-on exercises using a rabies surveillance dataset, participants will create descriptive summaries, maps, and time-series visualizations to identify disease patterns and surveillance gaps.

LEARN HOW TO

- ✓ Analyze disease patterns by space and time
- ✓ Create and interpret disease maps
- ✓ Visualize trends and outbreaks
- ✓ Generate evidence from surveillance data

ABOUT THE SPEAKERS

 July 8, 2026

 Joselito & Olivia Campos
Interactive Teaching Lab, Areté,
Ateneo de Manila University, QC

VICTORIA BROOKES | UNIVERSITY OF SYDNEY

Associate Professor, veterinarian and epidemiologist with experience in major animal disease outbreaks and rabies preparedness research. Fellow of ANZCVS and RCVS; Section Editor for PLOS NTD (One Health).

KATIE HAMPSON | UNIVERSITY OF GLASGOW

Professor of Disease Ecology & Public Health focusing on rabies transmission and control, with long-term field research in Tanzania.

MAFALDA VIANA | UNIVERSITY OF GLASGOW

Senior Research Fellow specializing in infectious disease modelling, integrating ecological and epidemiological data to understand and control disease systems.

ONE HEALTH SYMPOSIUM 2026

PRE-SYMPOSIUM WORKSHOPS

 July 8, 2026

 College '66 Room, Areté,
Ateneo de Manila University, QC

WORKSHOP B

Co-designing Prevention and Control Strategies through Local Policymaking and Implementation

OVERVIEW

This workshop introduces the governance, and policy foundations of disease prevention and control. Through discussions and collaborative exercises centered on rabies, participants will identify key stakeholders, governance challenges, and policy opportunities, and develop prevention and control strategies that are evidence-informed, equitable, and feasible within real-world contexts.

LEARN HOW TO

- ✓ Understand One Health local governance
- ✓ Analyze policy and decision-making processes
- ✓ Design context-sensitive prevention strategies

ABOUT THE SPEAKERS

NAI RUI CHNG | UNIVERSITY OF GLASGOW

One Health and evaluation scientist working on the design and evaluation of complex health and sustainability interventions. Leads interdisciplinary projects on public health, veterinary medicine, and education.

KERRIE WILEY | UNIVERSITY OF SYDNEY

Associate Professor in Public Health, specialising in the social and behavioural drivers of immunisation in human and animal health. Core contributor to WHO BeSD tools for understanding vaccination behaviour globally, and member of WHO SEAR Regional Immunization Technical Advisory Group.

University, QC

SELECT YOUR TRACK

Choose one of two parallel workshop tracks led by experts from the Philippines, the University of Sydney, and the University of Glasgow. As both workshops will be conducted simultaneously, participants **may register for only one session**

WORKSHOP A

An Introduction to Descriptive, Spatial and Temporal Analysis for Disease Surveillance

Victoria Brookes

Associate Professor
University of Sydney

Katie Hampson

Professor
University of Glasgow

Mafalda Viana

Senior Research Fellow
University of Glasgow

WORKSHOP B

Co-designing Prevention and Control Strategies through Governance, Ethics and Policy

Nai Rui Chng

Research Fellow
University of Glasgow

Kerrie Wiley

Senior Research Fellow
University of Sydney
